

R-Controlled Syllable Flash Cards

This is a r-controlled syllable flash card deck. You can use this in the warm-up with the deck portion of your lesson plan once you have explicitly taught r-controlled vowels.

When using these cards you can ask questions such as:

- What is the vowel?
- Look next door. Is it closed in?
- What will the vowel say?
- Read the syllable. What does it say?

R-controlled vowels can be found in many multisyllabic words and are their own syllable type. Adding these syllables to your warm-up provides students with more opportunities to accurately read this pattern in single syllables which will help them as they begin to read multisyllabic words.
